NEED DETAIL SPECIFICATIONS?

Audible-Player Summarised Specifications:

1. Physical features

- Handheld, solar powered unit
- Fast forward playback to help seek within a chapter.

- Play/pause indication
- Brail navigation markings assist the blind or visually impaired
- Low battery indication
- Missing or unauthorised content indication.
- Designed to operate under a wide range of harsh conditions
- Size: 103mm x 70mm x 21mm (4.1" x 2.8" x 0.79")
- Weight: 110 grams (4 oz.)

2. Audio/sound quality

- High audio quality and loud output from built-in speaker
- High fidelity 3.5mm stereo headphone/line output jack
- Up to 200 hours of audio content can be stored on a 2GB micro SD card

3. Content

- Extensive content library available for standard messages, including Bibles, New Testaments and Story of Jesus
- Content is stored on removable micro SD cards allowing an unlimited amount of audio content
- Additional content can be loaded and removed in the field by authorised distributors using simple PC-based software and a Micro SD card reader
- Content protection prevents the player from being used with unauthorised content and protects the content from unauthorised use
- Intuitive content navigation supports three levels of navigation: navigation: title, book and chapter

4. Accessories

- AC power adapter
- High volume external speakers and Ear buds
- Micro SD card loaders and Lanyard

5. Battery/charging

- High quality rapid-recharge battery
- Solar charged, offering over 9 hours of playback time from a single day of average sunlight
- Can be charged from a wide range of external DC power sources including 12 and 24V automotive sources
- DC-in has reverse polarity and up to 60V load-dump protection
- Rechargeable battery with long endurance and low selfdischarge rate.
- Battery charging is automatically inhibited when the temperature is too high or too low, thus pre-serving the battery from temperature damage.
